

Florida National University

Welcome Back

Florida National University (“FNU”) has remained operational during the recent COVID-19 pandemic. Faculty and staff have been providing quality education and support services throughout this national health issue. FNU students continue to excel and achieve their academic dreams, every day. This phased Welcome Back plan provides guidelines for faculty, staff, and students to safely return to FNU facilities. Our goal is to enable students to achieve their academic dreams in a healthy environment. FNU will continue to use multiple modalities and technological resources to deliver a quality educational experience. At FNU, we strive to provide excellent services to our students and to support our distinguished faculty. This plan will be reviewed and modified on an ongoing basis, including to reflect the most current relevant national, state, and local guidelines. We are committed to providing a safe environment for our FNU family.

FNU OPENS DOORS TO THE FUTURE

The primary objective of this plan is to maintain a safe environment for faculty, staff, students, vendors, and visitors that reflects current guidelines. FNU has reviewed and incorporated the guidelines provided by appropriate local, state, and national authorities. The University is adopting this plan with the intent to begin a phased reopening of campus facilities beginning August 31, 2020. Details regarding the reopening plan will be disseminated to students via BlackBoard, Guardian, the Publication page of the FNU website, and the student’s FNU email to ensure student receipt of information. Faculty and staff will receive guidelines through HR emails, Guardian, the Publication page of the FNU website, and their official FNU email.

This plan outlines FNU’s COVID-19 Phased Welcome Back Plan that follows guidelines established by appropriate local, state, and national authorities, including the federal Centers for Disease Control and Prevention (“CDC”). FNU’s phased Welcome Back guidelines also address institutional guidelines related to:

- Recommended Settings for Resuming Campus Activities
- CDC Guidelines
- Social Distancing
- Self-Identification and Reporting
- Screening Procedures to Enter FNU Facilities
- Points of Entry
- Faculty and Student Responsibilities

- Staff and Faculty Travel
- International Students
- Athletic Department Guidelines
- FNU Facilities
- Communication and Campus Safety
- Resources

Recommended Settings for Resuming Campus Activities

FNU incorporated guidance from several sources in the development of this plan. A leading component was guidance from the CDC entitled: [Considerations for Institutions of Higher Education \(IHE\)](#). Briefly, these considerations focus on three levels of risk settings. FNU will also observe additional guidance provided by appropriate local, state, and national authorities.

IHE General Settings:

- **Lowest Risk:** Faculty and students engage in virtual-only learning options, activities, and events.
- **More Risk:** Small in-person classes, activities, and events. Individuals remain spaced at least 6 feet apart and do not share objects (e.g., hybrid virtual and in-person class structures or staggered/rotated scheduling to accommodate smaller class sizes).
- **Highest Risk:** Full-sized in-person classes, activities, and events. Students are not spaced apart, share classroom materials or supplies, and mix between classes and activities.

CDC Guidelines

CDC Guidelines focus on the following key areas related to in-person events:

- Wash your hands often. If soap and water are not available, use hand sanitizer.
- Avoid close contact and maintain 6 feet distance.
- Utilize Personal Protective Equipment (PPE) that covers your mouth and nose when distancing 6 feet apart is not possible.
- Cover coughs and sneezes.
- Clean and disinfect frequently touched surfaces.
- Monitor your health daily.

Additional information regarding CDC recommendations can be found at the [CDC response to COVID-19 website](#).

Social Distancing

Social, or Physical, distancing is a conscious effort to maintain a minimum of six feet distance between yourself and another individual. In addition to maintaining social distancing in FNU facilities, Personal Protective Equipment (PPE) must be used as discussed below. PPE is a face mask that covers the nose and mouth.

FNU has taken the initiative to rearrange areas of frequent congregation, such as lobbies and classrooms, to meet social distancing guidelines. No one is to rearrange classrooms or common areas in a manner that eliminates or interferes with social distancing requirements. Signage and directional aids have been placed in areas of frequent congregation and high traffic pedestrian areas to remind people to maintain adequate safe distancing.

Classroom meetings will maintain physical distancing of at least six feet. This number is contingent on state or local executive orders, classroom size, and student enrollment per course section.

Self-Identification and Reporting

If faculty, staff, or students have been exposed to COVID-19, they must inform FNU and they will not be allowed to enter any FNU buildings, should seek medical attention, stay at home and quarantine for 10 days. In order to return to any FNU facility earlier than 10 days, a negative COVID-19 test result will need to be provided. For faculty and staff this will be provided to HR. For students, the negative COVID-19 test result will be provided to the Office of Student Services.

This includes faculty, staff or students who live or work with people that are positive for COVID-19. FNU acknowledges that we have faculty and students who work in healthcare facilities. Their service to the community in these difficult times is greatly appreciated; however, faculty and students who knowingly care for positive COVID-19 patients are not permitted to enter any FNU facility, except in compliance with CDC recommendations for healthcare workers and with specific permission from FNU. The University is currently preparing additional information. In the interim, impacted faculty should contact HR or their immediate supervisor, and impacted students should contact the Office of Student Services, before entering any FNU facility.

Anyone receiving a positive COVID-19 test result is not permitted to enter any FNU facility. For faculty who have a positive test result, you are to notify HR and your immediate supervisor. Your case will be reviewed by Academic Leadership and HR to determine if working from home is an option. If the faculty member is assigned to teach an on-campus course, notify your immediate supervisor so that your course can be reassigned to a substitute instructor. Our goal is to safely maintain the ability of students to continue their learning experience.

For students with a positive test result, you are required to notify the Office of Student Services regarding the test result immediately. You should also inform your instructor regarding attendance, but are not required to disclose medical information. FNU is incorporating numerous technology-based alternatives to allow students to remotely engage with instructors and maintain continuity of their studies. We have enhanced the BlackBoard learning platform and classrooms are being equipped with additional technology tools to enhance remote learning.

For students with a positive test result, you are required to notify the Office of Student Services immediately.

Screening Procedures to Enter FNU Facilities

Wellness Checks

Students and employees will be required to undergo a daily Wellness Check prior to entering any FNU facilities.

FNU has acquired the Guardian system to facilitate these Wellness Checks. The Guardian system is a free software application for your mobile device that automates the Wellness Check process. You can utilize the Guardian application to complete the Wellness Check from your mobile device. Once you complete the Wellness check, you will receive a digital pass that allows you to go straight to the elevated temperature screening stations (see below). The use of the Guardian system will reduce the time needed to safely enter an FNU facility.

The Wellness Check consists of a few basic questions to determine whether a person presents a potential risk to the FNU community.

For those who do not wish to download and use the free Guardian application on their mobile phones, an alternative manual screening process will remain in place. A paper version of the Wellness Check will be available at the Training Center, South Campus, and at the Main entrance lobby of the Hialeah campus. If you choose to opt-out of the Guardian Wellness Check protocols, you will not be permitted to enter through any other locations, unless you have an ADA accommodation. People entering the Hialeah facility that do not utilize the Guardian Wellness Check protocols and who require an ADA accommodation, will be permitted to enter through the Main lobby of both the JR Building and Main building. The process will include a daily written Wellness Check, an elevated temperature screening, and the use of a color-coded wristband to identify you as someone permitted to be on campus. You will be required to complete this process one time per day.

Entrance Screening Stations

In addition to the Wellness Check, a second screening will be conducted using an elevated temperature screening system. Every FNU facility is deploying technology to measure elevated temperatures as people enter through the designated points of entry. The elevated temperature screening technologies are non-invasive, non-contact, HIPAA compliant scanners that determine whether a person has an elevated temperature. FNU established the threshold for acceptable elevated temperature at 100.4 Fahrenheit. Anyone with a temperature that exceeds 100.4 Fahrenheit will not be permitted to enter any FNU facility. If denied entry for elevated temperature, the individual will receive an information sheet with recommended actions. Faculty and staff that are denied entry will receive additional guidance from HR or University

Leadership. The individuals conducting the elevated temperature screenings will be adequately trained, wear proper PPE, and follow CDC guidelines.

Confidentiality

The results of any student wellness check or other screening will be kept confidential in accordance with the Family Educational Rights and Privacy Act (“FERPA”), and will not be disclosed except in limited cases where the University determines that knowledge of the information is necessary to protect the health or safety of another student or other individual.

Points of Entry

Training Center – Main Lobby (ALL faculty, staff, students, vendors, and visitors)

South Campus – Main Lobby (ALL faculty, staff, students, vendors, and visitors)

Hialeah – Main Building Lobby (Faculty, staff, students, vendors, and visitors and ALL individuals who choose not to use the Guardian Wellness Check Protocols). **ADA Accessibility is provided on the 1st Floor Lobby of the Main Building**

Hialeah – Jose Regueiro Building 4th Floor Bridge (ONLY Faculty, Staff, and Students utilizing the Guardian Wellness Check Protocols). **ADA Accessibility will be provided on the 1st Floor Lobby of the Jose Regueiro Building**

Hialeah – Little Angels Daycare (Entry into the Daycare is for Staff and Children ONLY. No parents or guests are permitted)

Faculty and Student Responsibilities

Our objective is to create a safe environment for those students returning to the University. FNU has considered the recommendations contained in the [CDC Considerations for Institutions of Higher Education](#) and the [CDC Interim Considerations for Institutions of Higher Education Administrators for SARS-CoV-2 Testing](#), along with other relevant local, state, and federal guidelines. All faculty, staff, and students will be required to follow FNU guidelines when entering any FNU facility. Everyone entering an FNU facility is required to be compliant with all policies and safety protocols. FNU reserves the right to require any individual to leave FNU facilities for non-compliance.

Students

It is the responsibility of each student to make sure that proper social distancing, use of Personal Protective Equipment (PPE), and hygiene are followed. Any student violating FNU guidelines to reduce the spread of COVID-19 will receive a verbal warning, and a second violation will result in a written warning that will be entered into the student’s record. If the student is willfully non-compliant with FNU guidelines, the student will be subject to additional administrative sanctions, up to and including suspension from FNU.

Student responsibilities while on campus:

1. General Requirements:

A. Complete the Wellness Check prior to entering any FNU Facility.

B. Utilize Personal Protective Equipment (PPE)

- Students are required to wear a mask except while eating.
- Students may choose to wear additional PPE, such as gloves, goggles, or face shields.

C. Follow all CDC recommended health and safety guidelines, in particular:

- Hand washing after using the bathroom, eating, blowing one's nose, coughing, sneezing, etc.
- Utilize hand sanitizer whenever hand washing is not possible.
- Use a barrier when sneezing or coughing, such as a tissue or the crook of the elbow.
- Avoid touching the face.
- Avoid physical contact with faculty and other students unless required for teaching practical skills or during an emergency. In these cases, additional PPE use may be warranted.

D. Personal Items

- Students should bring their own food and drinks.
- All bottles must have a lid.
- No sharing of food or drink items.
- No sharing of nonfood items such as phones, computers, writing implements.

2. Campus Navigation

- Follow all entrance/exit signage at your campus.
- Arrive to the campus early to avoid being late to class due to new screening processes. Plan accordingly.
- Always display your student ID while on campus.
- Students are encouraged to utilize the stairs, whenever practical, to assist those in our community with mobility issues.

A Healthy Campus Depends on You

Faculty and Staff

It is the responsibility of every FNU employee (including faculty members and staff) to make sure that proper social distancing, use of PPE, and hygiene are followed. Employees are required to comply with, and enforce, all FNU guidelines regarding COVID-19 at an FNU facility. Employees that observe student violations are required to immediately address the issue. Faculty are responsible for the safe and healthy operation of their classrooms. Violations that are observed involving faculty and staff should be directed to the faculty or staff member's immediate supervisor or Campus Dean. Additionally, anonymous reporting of non-compliance with safety protocols is provided through the Guardian system. Any concerns that cannot be directly addressed by the faculty should be directed to the Campus Dean.

Employee Responsibilities while on campus:

1. General Requirements:

A. Complete the Wellness Check prior to entering any FNU Facility.

B. Utilize Personal Protective Equipment (PPE)

- Employees are required to wear a mask except while eating.
- Employees may choose to wear additional PPE, such as gloves, goggles, or face shields.

C. Follow all CDC recommended health and safety guidelines, in particular:

- Hand washing after using the bathroom, eating, blowing one's nose, coughing, sneezing, etc.
- Utilize hand sanitizer whenever hand washing is not possible.
- Use a barrier when sneezing or coughing, such as a tissue or the crook of the elbow.
- Avoid touching the face.
- Avoid physical contact with colleagues and students unless required for teaching practical skills or during an emergency. In these cases, additional PPE use may be warranted.

D. Personal Items

- The employee should bring their own food and drinks.
- All bottles must have a lid.
- No sharing of food or drink items.
- No sharing of nonfood items such as phones, computers, writing implements.

2. Campus Navigation

- Follow all entrance/exit signage at your campus.

- Inform students of entrance/exit processes.
- Be flexible if students are late during the first two weeks of class due to new screening processes.
- Enforce the use of IDs on campus in the classrooms.
- Encourage use of stairs over elevators for both employees and students.

3. Classroom Maintenance:

- Enforce social distancing (6-feet) of students and faculty in the classroom (except to the limited extent needed during the teaching of practical skills). This includes the placement of desks and only using desks identified as available. Any desks blocked for use to maintain social distancing must remain that way.
- Always require masks in the classroom. No exceptions.
- Notify an administrator if any student presents symptoms of COVID-19, or other illness, and immediately send the student home.
- Encourage frequent student hand washing and use of hand sanitizer.
- Enforce cough and sneeze etiquette.
- Record all classroom teaching and activities for synchronous and asynchronous use by students.

Faculty are responsible for the safe and healthy operation of their classrooms.

Faculty Instruction

FNU Executive Leadership is acutely aware of the faculty role in providing quality teaching and fostering a positive learning environment. The Division Heads are responsible for ensuring faculty within their departments and programs are providing effective and dynamic teaching sessions to maximize student engagement and learning. The Deans and Division Heads have access to all courses in BlackBoard and will randomly observe classes throughout the semester. Any faculty member offering inadequate effort and engagement with students will be counseled by the Department and/or Division Heads, the Office of the VPAA, Campus Deans and HR in accordance with FNU Faculty Handbook policy 7.10. Faculty will be given the opportunity to improve their methods and efforts. If the faculty member is unable to improve, a replacement faculty member will be assigned to the course. Faculty that is unable to remediate performance may receive disciplinary action.

Staff and Faculty Travel

If you must travel outside of Dade County, Broward County, Palm Beach County, Monroe County, and Collier County, you must ask your supervisor for prior authorization in accordance with FNU vacation policies. Once you return from traveling, you must comply with the required days in quarantine, as follows:

For International Travel: When you return from international travel, do not come into work for 14 days. Employees will be able to use sick or vacation days accrued. As with all time off, you must seek advance permission from your supervisor before the travel. Failure to follow these guidelines may result in disciplinary action, up to and including termination.

For Domestic Travel: When you return from out-of-state travel or travel within the State of Florida, but outside of Miami-Dade, Broward, Palm Beach, Monroe, and Collier Counties, or if you went to a theme park or amusement park, do not come to work for seven days. Employees will be able to use sick or vacation days accrued. As with all time off, you must seek advanced authorization from your supervisor before the travel. Failure to follow these guidelines may result in disciplinary action, up to and including termination.

Employees who believe they have been exposed to COVID-19 through travel (domestic or international) must seek immediate medical care. The employee must quarantine for at least 10 days from the last date of the potential exposure to COVID-19. Failure to do so may result in disciplinary action, up to and including termination.

International Students

On July 24, 2020, the [Student and Exchange Visitor Program \(SEVP\)](#) released new guidance regarding the Fall 2020 semester.

Continuing International Students

The current guidance is as follows for international students who were enrolled and who were in valid F-1 or M-1 nonimmigrant status on March 9, 2020:

No in-person enrollment requirement. Current international students with an active SEVIS record as of March 9, 2020 may engage in any modality of courses for the Fall 2020 semester if you are enrolled full-time. This means that your classes can be fully online, in-person, or in any other modality offered at FNU.

You can also take online classes from outside of the United States. If you are currently outside of the U.S. or plan to travel home, you can continue to maintain an active SEVIS record by enrolling full-time in online classes.

FNU has updated our policies to reflect this guidance. International students who were enrolled prior to 03/09/2020, and who are currently outside the United States, may re-enter the country under their student visa, even if they are taking courses entirely through Distance Learning. The Registrars, in conjunction with Division Heads, will plan to provide the students with different options to graduate on time and the possibility to access courses in different modalities. International students should contact the SEVIS coordinator, Academic Advisors, and the

Registrars to determine if they are compliant with Federal guidelines covering International students during COVID-19.

New International Students

International (F-1 or M-1 visa) students in new or initial status after March 9, 2020 will not be able to enter the United States to enroll in the University for the Fall 2020 term to pursue a course of study that is 100 percent online.

The Academic Advisors and Registrars will be required to ensure that international students in new or initial status after March 9, 2020, and who wish to enter the U.S. for the Fall 2020 semester, are not permitted to pursue a course of study that is 100 percent online for such semester. New international students will not be issued a Form I-20 (required to seek a student visa) if they intend to pursue a course of study 100 percent online.

New international students may enroll in a course of study that is 100 percent online, but will be required to do so from their home country.

Responsibilities of Participants in Athletic Activities

Athletic Trainers Athletic trainers are responsible for conducting screenings, cleanings, and compliance with all health and safety protocols. They are required to maintain regular communication with the Athletic Director. Additionally, they are to monitor that all student-athletes, coaches, event personnel, officials, and other athletic trainers are following all Health and Safety Protocols. Anonymous reporting of non-compliance with safety protocols is provided through the Guardian system.

Coaching Staff and Event Managers All coaches are responsible for following Health and Safety Protocols and communicating regularly with the Athletic Director, athletic trainers, and athletic personnel at other institutions. They are also responsible for monitoring that all student-athletes, other coaches, athletic trainers, event personnel, and officials are following the Health and Safety Protocols. Anonymous reporting of non-compliance with safety protocols is provided through the Guardian system.

Student Athletes All student-athletes are responsible for following the Health and Safety Protocols and communicating regularly with their coaching staff and athletic trainers. Student athletes should also monitor that other student-athletes, coaches, athletic trainers, event personnel, and officials are following the Health and Safety Protocols. Anonymous reporting of non-compliance with safety protocols is provided through the Guardian system.

Athletic Department Guidelines

The FNU Athletic Department is incorporating [NAIA standards and protocols](#) to safely return to athletic activities. Health and safety concerns are paramount for all student-athletes and coaching staff. Detailed protocols will be provided through the Athletic department. Student athletes should consult the full guidelines provided by the Athletic Director. Some of the specific protocols include:

Student Athlete Screening Guidelines for Athletic Activities:

Three hours before any athletic activity/event, practice/conditioning sessions, or game/contest/competition, all participants, including the student-athletes, coaching staff, and all event personnel/officials, must be screened. An athletic trainer, designated healthcare professional, or objective personnel from the host institution must conduct the screenings.

Minimum Screening requirements are as follow:

- A) **Temperature check/monitoring:** Must be below 100.4 degrees
- B) **Observation/monitoring:** or symptoms of illness (viewed or self-reported)
- C) **Exposure questioning:** per the NAIA standard questionnaire

Health and Safety Protocol for Athletic Activities

All parties are responsible for bringing their Protective Equipment (PPE), providing their sanitation materials, and maintaining social distancing of at least six feet. Additionally, all parties are responsible for bringing other common personal athletic equipment (e.g., water bottles, towels, etc.), and should not share these materials with other parties.

All parties must provide their face covering (i.e., mask, face shield, or goggles), which fully include their nose and mouth. Disposable masks should not be reused and disposed of after use. Cloth masks should be washed after every use, including before and after all athletic activities.

All parties should practice regular sanitation efforts by washing their hands for at least 20 seconds, bring their hand-sanitizer, and/or wear gloves if possible. The social distancing of at least six feet should always occur, unless necessary per the scope of the athletic activity. If any part of this Health and Safety Protocol is not being followed, please contact the athletic director.

Travel Guidelines for Athletic Activities

Travel to athletic events should be limited as much as possible while remaining able to meet NAIA minimum contest requirements. Out-of-state travel should be restricted to a select few contests (i.e., USCAA Championship or Sun Conference contests). It should be limited to nearby states where COVID-19 rates have been decreasing.

Flying to competitions, and staying overnight in hotels, should be eliminated unless necessary for the nature of the competition (e.g., early morning contests). If staying in hotels, no more than one individual is allowed per bed, to coincide with social distancing guidelines. Take this into consideration when looking at the travel budget.

Before traveling, all parties must be screened before leaving campus. Anyone not cleared by the screening will not be allowed to go and should be referred to a healthcare professional. All parties are required to follow all Health and Safety Protocol when traveling. All this information must be communicated with the athletic staff at the host institution.

The host institution should also be provided with "*an official team party roster,*" showing that all individuals have been cleared for participation. Communication with the host institution should occur after departure to inform how many individuals they should expect to receive. Upon arrival, our traveling parties should expect to be re-screened by the host institution. If someone were not to pass the later screening, they are to remain isolated from others as much as possible.

Home Athletic Events

Home athletic events for FNU are held in City of Hialeah properties. Any home athletic events will be subject to the approval of the City of Hialeah. If approval is obtained, FNU will screen participants and event personnel. Anyone not cleared by the screening must be removed from the home event and should be referred to a healthcare professional. Cleaning procedures must also be followed. “*An official team party roster*” should be provided to visiting teams upon their arrival.

For institutions traveling to FNU home events, we must provide the visiting institutions with our Health and Safety Protocol for that event/facility before the competition. Visiting institutions must provide “*an official team party roster,*” showing that all individuals have been cleared for participation and should communicate that information after their departure.

Upon arrival at FNU home events, all visiting parties will also be re-screened. If a visitor were not to pass the screening, they are to remain isolated from others as much as possible. Officials are to be screened as well. All essential participants at home events are required to follow all Health and Safety Protocols and are to not be in direct contact with any teams, coaches, officials, or other event personnel. Due to Miami-Dade County regulations no fans will be permitted to attend athletic events, until further notice.

Mandatory Communications for Athletics

If any FNU party, including but not limited to student-athletes, coaches, trainers, athletic staff, were to test positive for COVID-19, this information must be provided to other institutions which that individual may have had contact within the previous 14 days. That information must also be provided to any institutions scheduled for an event in the upcoming seven days.

FNU Facilities

Facilities will receive enhanced cleaning protocols as part of the FNU reopening plan. These enhanced procedures will be in place at all FNU facilities, with the understanding that there are unique issues related to certain FNU facilities. The South campus and the Training Campus are leased facilities; therefore, it will depend in part on the landlords to clean and disinfect the common areas, areas of frequent congregation, or frequently touched surfaces. The general cleaning protocols include cleaning high contact surfaces daily. Maintenance teams will be required to conduct frequent rounds to clean high touch surfaces. The cleaning of surfaces will also entail daily disinfection of the university facilities. The following are the specific areas that will be cleaned or disinfected.

- Tables
- Benches
- Elevator controls
- Chairs
- Classrooms
- Desks
- Doorknobs
- Sinks
- Washrooms
- Electric switches
- Computer keyboards

Dining Area

Dining Areas include all the places where faculty, staff, and students are provided a designated area to consume food. Cafeterias are closed at this time at the Hialeah campus. Resumption of food service is contingent on local, city and county restrictions. In an abundance of caution, the cafeteria food service will remain closed until additional guidance is received from city and county authorities. Cafeteria dining areas are open for people to eat self-provided meals. These areas have been reconfigured to meet limitations on capacity and manage safe distancing.

HVAC

HVAC plays a role in maintaining a healthy environment for people entering FNU facilities. The CDC recommends temperature control in the range of 68-76° F [20-24.4° C] and humidity control in the range of 20%-60%. FNU has modified HVAC protocols standards to meet these guidelines

Elevators

Elevators are receiving enhanced cleaning protocols due to the enclosed nature. We will be limiting elevator capacity to four individuals. To assist those in our community with mobility issues, faculty, staff, and students are encouraged to utilize the stairs whenever practical.

Communication and Campus Safety

FNU has acquired the Guardian system to enhance communications with faculty staff and students regarding policies and protocols related to COVID-19. The Guardian system is a free software application for your mobile device that allows you to automate the Wellness Check process. Before entering any FNU facility, every individual is required to complete a daily Wellness Check. You can utilize the Guardian application to complete the Wellness Check from your mobile device. Once you complete the Wellness check, you will receive a digital pass that allows you to go straight to the elevated temperature screening stations. The use of the Guardian system will reduce the time needed to safely enter an FNU facility. In addition to expediting the entry process into an FNU facility, the Guardian system is an enhanced system for receiving information from FNU. We will utilize the system to communicate any changes in COVID-19 protocols, provide information about university activities, and to communicate critical safety information to all users of the application. Guardian has an anonymous mode that allows an individual to share any unsafe conduct or suspicious activity on campus. Guardian is not a contact tracing application, so users are not being tracked while in FNU facilities. Beyond COVID-19, Guardian provides a full range of safety features to enhance campus safety and security. As the full Guardian software implementation continues, additional features will be deployed to enhance campus safety and security.
